Hyper-dri

The Magnum **Hyper-dri** is a high power, automatic hand dryer that will dry your hands in approximately 10 seconds. Using only 850 watts of power, its clever design takes its heat from the brushless motor thus alleviating the need for a separate heater element.

The Magnum Hyper-dri has 3 sensors which can detect your hands from three different directions. Its removable drip tray, which collects any surplus water, eliminates water dripping on the floor. With an attractive silver finish it will fit in with most environments.
